TOPICS

The topics are related to the central theme of the conference: Teaching–Studying–Learning (TSL) Processes and Mobile Technologies–MIT Research Approaches.

1. Computer supported collaborative learning
2. Design and development
3. Emotionality in TSL processes
4. Globalisation
5. Hypermedia
6. Intelligent tutoring systems
7. Learning objects
8. Media as a tool, as an intellectual partner, as a context, as an empowering mediator
9. MIT research
10. Mobile technologies
11. New pedagogical models
12. Open source
13. Narrativity in TSL processes
14. Playfulness and game-based learning
15. Semantic web
16. Simulations
17. Social navigation
18. Teaching–Studying–Learning (TSL) processes
19. Usability
20. Virtual reality
21. ICT tools for teaching and learning

PROVISIONAL CONFERENCE TIMETABLE

WEDNESDAY 14 September

Registration of early arrivals and welcome reception

THURSDAY 15 September

Keynote session, regular sessions and reception

FRIDAY, 16 September

Keynote session, regular sessions and conference dinner

SATURDAY 17 September

Social programme

REACHING ROVANIEMI, LAPLAND

For more information on Rovaniemi and for maps, please consult the city home page in English at <http://www.rovaniemi.fi/english.htm> or the conference home page <http://www.ulapland.fi/NBE>.

TRAVEL

There are frequent flights to the capital city of Helsinki,

NBE (former PEG)

PEG, originally established in 1985, linked Logic Programming and Education. Gradually, PEG's focus expanded to encompass all elements of intelligent computer, information and communication technologies (ICTs), and mobile technologies that involve teachers, students of all ages, as well designers and researchers. Thanks to this broadened interest, PEG is now known as NBE, Network-Based Education.

NBE has developed into an informal and friendly conference which participants attend regularly to exchange ideas and information. NBE 2005 will be the 12th international conference. NBE is an association of those interested in the relationship between information, and communication technologies (ICTs), and mobile technologies, teaching, studying and learning, and multi-, inter- and transdisciplinary (MIT) research processes. For over a decade, the NBE international conferences have explored ideas at the cutting edge of developments in the fields of artificial intelligence, epistemology, psychology and education in relation to the interaction between teacher, learner, researcher, curriculum, culture and technology.
